OVERVIEW

2

Model: CT-01

Model: CS-03

SETTING THE CALENDAR 5

The clock displays the Hijri or Gregorian calendar. To toggle between the two calendars, press **SET**.

To set the Gregorian (or Hijri) calendar, first make sure that the desired calendar is displayed, then follow the steps below:

	1) Move the setting switch to and press SET twice.
	2) Use or to adjust the days, then press SET .
	3) Use or to adjust the months, then press SET .
	4) Use or to adjust the year, then press SET .
	5) Switch back to position.

NOTE After setting the Gregorian calendar, the Hijri calendar will be re-calculated according to the moon sighting at Makkah for that date. But, changing the Hijri calendar, does not affect the Gregorian calendar.

SETTING THE TIME 4

Setting the time, the calendars and the three alarms are almost the same. Note that when setting and number in the clock, that number will be flashing.

To set the time, follow the steps below:

	1) Move the setting switch to
	2) Use or to adjust the hours, then press SET (Notice the AM/PM icons)
	3) Use or to adjust the minutes, then press SET
	4) Switch back to position.

NOTE Whenever minutes are changed (in step 3), the seconds will be reset to **00**

SETTING FAJR ALARM 7

This unique feature allows you to wake up exactly at the same time relative to fajar azan everyday.

For example, suppose you set this alarm to 5:10 AM and the fajar azan is at 5:00. If fajar azan becomes 5:01 in the next day, then automatically the fajar alarm will change to 5:11 AM. This way, the alarm will always ring 10 minutes after fajar azan everyday. To set this alarm, lookup the current fajar azan time from the clock and decide your desired wake up time, then follow the steps below:

	1) Move the setting switch to
	2) Use or to adjust the hours, then press SET
	3) Use or to adjust the minutes, then press SET
	4) Switch back to position.
	5) Turn ON the alarm switch. The icon will be displayed.

NOTE If Fajar alarm is set to ring exactly at Fajar azan time, the sound of azan will be disabled.

SELECTING YOUR CITY 6

To select a city, look up the telephone code of your city (see page 19)*, and follow the steps below.

	1) Press the city select button, in models CS-03 & CW-05 & CJ-07
	In model CT-01, first move the city dialer and then return it back to (Other Cities) position.
	2) Use or to adjust the city code, then press SET
	Qibla direction and angle will appear (see page 12).

* If your city is not listed, follow the steps on page 16 or refer to: www.alfajr.com/newcity

NOTE If azan times are not correct, make sure to correctly set: Gregorian calendar, city code, DST option, and a suitable taqweem system for your city (see page 14).

WEEKEND SETTING 9

The daily alarm can be automatically disabled on weekends, as per the following options:

- rings everyday except Saturday and Sunday
- rings everyday except Sunday
- rings everyday except Friday and Saturday
- rings everyday (no icon, or blank)

Example: To set the daily alarm to ring everyday except Sunday, follow the steps below:

	<p>1) Move the setting switch to and press (SET) twice.</p> <p>2) Use or to select the symbol then press (SET). The selected days will be flashing</p> <p>3) Switch back to [N] position.</p> <p>4) Turn ON the alarm switch. The icon will be displayed.</p>
--	--

NOTE If the weekend in the selected city is on Thursday and Friday, means this alarm doesn't ring on Thursday and Friday and means it does not ring on Fridays.

STOPPING THE ALARMS 11

Simply press the **STOP** button to stop any alarm (in this case, the alarm will ring again on next day).

Alarms can also be stopped by turning off the alarm switch (but in this case, the alarm will not ring again on the next day).

NOTE Note: To cancel any alarm in the coming 20 minutes, press and hold the **STOP** button until you hear the beep.

SNOOZE OPTION

When the switch is turned ON, the clock will be in snooze mode (and the **snz** icon will be displayed). In this case, after stopping the alarm (by pressing the **STOP** button), the alarm will ring again after five minutes. (Notice that the **snz** icon will be flashing).

To completely stop the alarm, press and hold the **STOP** button for few seconds until you hear the beep. (Notice now that **snz** icon is not flashing).

SETTING DAILY ALARM 8

The daily alarm is a regular alarm that rings at the same time everyday. Moreover, this alarm can be set to ring only on weekdays (see next page).

Setting the daily alarm is shown below:

	<p>1) Move the setting switch to </p>
	<p>2) Use or to adjust the hours, then press (SET)</p>
	<p>3) Use or to adjust the minutes, then press (SET)</p>
	<p>4) Switch back to [N] position.</p>
	<p>5) Turn ON the alarm switch. The icon will be displayed.</p>

NOTE To stop any alarm, you may press **STOP** button (rather than turning OFF the alarm switch).

SETTING SPECIAL ALARM 10

In addition to fajar and daily alarms, this clock also include an extra alarm (special alarm) for one time appointment. When this alarm is set, the other two alarm settings are not affected.

The steps below illustrate the setting of this alarm.

	<p>1) Move the setting switch to </p>
	<p>2) Use or to adjust the hours, then press (SET)</p>
	<p>3) Use or to adjust the minutes, then press (SET)</p>
	<p>4) Switch back to [N] position.</p>

NOTE After setting this alarm, the icon will appear on the screen. To cancel this alarm, press and hold the **(SET)** button for few seconds; you will hear a soft beep, and the icon will disappear.

AZAN ACTIVATION & SELECTION 13

The sound of the azan can be played at every azan time. And the volume level can be adjusted using the volume switch.

When the azan sound is turned OFF, the icon will disappear from the screen, and three beeps will sound at the time of each azan.

Models CW-05 and CJ-07 also include a speaker jack which can be connected to an external speaker.

In addition, model CJ-07 have multiple azan sounds, as follows:

- Makkah Azan
- Madinah Azan
- Quds Azan
- Egypt Azan
- Riyadh Azan

An azan sound can be selected using the "azan sound selector". The selector is located on the left side inside the setting door.

If "Random" option is selected, the clock will randomly play different azan sound at every azan time.

DST

DAYLIGHT SAVING TIME 12

To set Daylight Saving Time (DST) for any city (except cities in the Arabian peninsula), press and hold the button for few seconds. You will hear a soft beep and will notice that the current time and the azan times are increased by one hour. The icon **DST** will also appear on the screen.

To get back to standard time, press and hold button for few seconds. The **DST** icon will disappear and the current time and azan times will decrease by one hour.

QIBLA DIRECTION

After selecting your city code, the qibla direction will appear on the screen. The exact qibla angle will also be displayed. The angle is between 0 and 360 degrees, clockwise from North.

Example: After selecting London's city code "44-207", the clock will display the qibla direction (South East) and qibla angle (119 degrees, clockwise from North), as follows:

AZAN SAFETY TIME 15

As needed, any azan time can be adjusted forward or backward by a fixed number of minutes, as follows:

- Press and hold
- Move the switch to position, then release
- Use or to set the safety time for fajr azan. Fajr azan time will be displayed.
- Press to adjust Shuroq safety time, ... etc.
- Return the switch to position.

NOTE After selecting another city, all safety times are reset, and need be re-adjusted if needed.

HIJRI CALANDER CALCULATION

The Hijri calendar in this clock is calculated based on the astronomical moon sighting at Makkah. Accordingly, Hijri date is re-calculated after setting the Gregorian calendar.

This unique feature helps to determine the Gregorian dates for the corresponding Hijri-based Islamic events. For example, to know Eid Al-Fitr in the year 1431, set the Gregorian date to 10/9/2010, then check whether the calculated Hijri date is 1/10/1431 or not.

AZAN TAQWEEM SYSTEMS 14

Fajr and Isha times are calculated by either an angle of the sun below the horizon or by an interval of time.

This clock is programmed to use the local taqweem or the most widely used system for your city. Also, you can change to another system, as follows:

Selecting Hanafi Asr Azan:

Press and hold and move the switch to the position, then release Use or to select **H** (which means Hanafi) or which means regular Asr time. Notice that Asr azan time will be flashing (and changing) during Hanafi setting mode.

Selecting Taqweem System (for Fajr & Isha):

Press and hold and move the setting switch to the position then release and press it again.

Use or to select the desired system as follows:

- Local taqweem
- 18:17** Muslim League
- 15:15** Islamic Society of North America (ISNA)
- 18:18** Islamic Scientific University (Hanafi)
- 19:17** Egypt taqweem
- 19 F** Um Alqura taqweem
- 1:30** Fajr azan is **1:30** hours before Shuroq and Isha azan is **1:30** hours after Magrib.

NOTE After re-selecting a city, the clock will be reset to use the city's default taqweem.

BATTERIES & DC-JACK

17

This clock is powered by **AA** size alkaline batteries. Replace batteries when **LOW BAT** icon appear on screen, and you will notice that azan sound becomes weak.

Alkaline batteries can last more than six months when azan is played regularly with maximum volume.

Models CT-01, CW-05 and CJ-07 also have a DC jack. You can use a (Nokia phone) charger.

You may also use any other 6 Volt adapter with at least 500 mA. Note that polarity should be positive to inside and negative to outside.

TEMPERATURE DISPLAY

The clock displays the temperature reading in degrees Celsius (°C).

Model CJ-07 also include a wire that can be used to display the external temperature.

To display the external temperature, place one end of the wire outside and plug the other end in the temperature (blue) socket. The icon (**OUT**) will also be displayed on the screen.

ADDING NEW CITY

16

This clock can be used anywhere around the world. You can select your city directly by selecting its city code, see page 6.

If your location is not one of the major listed cities on page 19, your location can be added to the list of cities as "NEW CITY" using (999-999) city code.

Refer to: www.alfajr.com/newcity

If you do not have access to the internet, you may program "your city" by using an already "listed city" (which is close to your city), as shown below:

Example:

To program Lausanne city in Switzerland, (with azan times two minutes before Geneve):

- 1/ Select **999 - 999** newcity code
- 2/ Select **41 - 22** Geneve city code
- 3/ Select **- 2** Azan difference
- 4/ Select **18 : 17** Muslim League taqweem

Now, Lausanne city code is **999 - 999**

NOTE To get more accurate azan times, refer to: www.alfajr.com/newcity

FREQUENTLY ASKED QUESTIONS

18

- Q:** Azan times are not correct. Why?
A: Make sure you have correctly set the following: **a)** city code, **b)** Gregorian calendar, **c)** Daylight saving time option, **d)** Taqweem system (azan time calculation methods).
- Q:** Can other cities be programmed in this clock?
A: Yes, any location can be programmed (page 16).
- Q:** How can I set the daily alarm so that it will not ring on Sundays?
A: Follow the weekend setting on page 9 and select the little symbol in step 2.
- Q:** How can I find out the astronomical beginning of Ramadhan at Makkah for any year?
A: Set the Gregorian calendar to the expected date, then check the astronomically calculated Hijri calendar.
- Q:** I can not hear the Azan sound. Why?
A: Make sure the alkaline batteries are not weak and the volume control switch is turned ON, and the icon is displayed on the screen.
- Q:** The azan sound is working for all prayers except for Fajr azan. Why?
A: It is possible that Fajr alarm is set to ring exactly at Fajr azan time.
